FEEDING DIRECTIONS:

Feed free-choice from sheltered feeders or mix into finished rations for goats to provide approximately 1/4 to 1/3 ounces/head/day. This feed rate will provide selenium at 0.35 to 0.47 mg/head/day. Maintain a supply of clean, fresh water.

LIMITATIONS FOR USE:

Do not feed to sheep due to high levels of supplemental copper.

IMPORTANT:

Follow these management practices:

1. Goats receiving phosphorus deficient diets may over-consume this product when it is first offered.
2. Place the mineral feeder near the water supply or in the animal's loading area.
3. Put out fresh mineral at least once per week.
4. Feeding free choice salt is not required with this mineral.
5. Provide fresh, clean water near the feeding area.

CAUTION:

Store in a dry, well-ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss or death.
