

Purina® Game Fish Chow™

Specie: Fish & Aquatics **Type of Feed:** Complete **Form of Feed:** Extruded

General Description:

A complete and balanced 32%-protein ration formulated to enhance the natural diet of bluegill, hybrid sunfish, catfish, minnows and many other fish species and sizes. Purina® Game Fish Chow™ feed is rich in nutrients essential for optimal fish growth, reproduction and overall health. It works naturally with everyday food sources in your water to overcome poor nutrition, which is the most significant limiting factor in the size and health of forage fish.

PURINA®

naturally with everyday food sources in your water to overcome poor nutrition, which is the most significant limiting factor in the size and health of forage fish.

3. Since bass prey aggressively on these fish, a better crop of forage fish can result in h larger, healthier and greater numbers of bass in your water.
4. For best results, feed as much Game Fish Chow™ feed as the fish will consume in 15-20 minutes.
5. If feed is completely consumed within 15 minutes, gradually offer the fish additional feed.
6. If feed is still floating on the surface after 20 minutes, the quantity of feed offered should be decreased.
7. If you overfeed you will reduce water quality.
8. Feed at the same time each day so fish will expect to be fed. Twice a day feedings are best during high fish activity.

LIMITATIONS FOR USE:

FEEDING DIRECTIONS:

1. Purina® Game Fish Chow™ Product is a complete and balanced 32%-protein ration that is ideal for feeding bluegill, carp, hybrid sunfish, catfish, minnows and many other fish species that normally populate ponds.
2. Purina® Game Fish Chow™ feed is rich in nutrients essential for optimal fish growth, reproduction and overall health. It works.

Available Options:

Product No.	Package	Size Diameter
0001363	Bag 50#	Multiple sized particles with the largest particles 1/4 x 1/4 inch.

Product Features:

Product Benefits:

Optimal Growth and Overall Health	High levels of top-quality protein ensure your fish receive the optimum nutrition they need to achieve their genetic potential for growth and health.
Feeds a Wide Variety of Fish Species and Sizes	By providing various particle sizes, your fish are sure to find one that will fit the size of their mouth. This allows you to provide top nutrition for the many types, sizes and ages of fish in your water - all with the same bag of feed.
Optimal Digestibility	Extruded particles are “cooked” during the manufacturing process. Because fish have very simple digestive systems, these pre-cooked particles can allow for optimal digestibility.
Evaluate the Health of Your Fish and Ensure the Correct Feeding Amount	Floating particles help bring your fish to the surface. This allows you to evaluate their size and health and make sure you are not over- or under-feeding them.
More Cost-Effective than Stocking Fingerlings Every Year	Feeding Game Fish Chow™ feed to your forage fish can cost less than feeding stocked fingerlings to your bass every year.
Larger, Heavier and More Numerous Game Fish	As forage fish become larger, they become a better food source. With a better food source, your bass can become much larger, heavier and more numerous.

IMPORTANT:

This product is to be fed only to the animal species as directed on this label. Follow these management practices:

1. A feeding program is only as effective as the management practices followed.
2. Start feeding Game Fish Chow™ Product in the spring when the water temperature rises above 55°F.
3. Reduce the amount of feed when water temperature exceeds 85°F and do not feed when water temperature exceeds 90°F or in hot, still, cloudy weather.

CAUTION:

Store in a dry, well-ventilated area protected from rodents and insects.
Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss, or death.

KEY POINTS:

1. Consumption can vary depending upon water temperature, season of the year, nutritional needs of the fish, availability of other foods and fish familiarity with particle feed.
